

Tips For Success

How To Use The Manual Measurement Tool

The GeoWarehouse Property Report offers many measurement options including a manual measurement tool.

1. To find the measurement for a property, select **Property Report** and then **Property Details** or **View Measurements**.

2. The manual measurement tool is available in the aerial map on the left side of the page.

3. To enlarge the aerial map, select the **Expand**  icon in the top right corner of the map.

4. To enable the manual measurement tool, select the **Measure** icon

5. Select a point on the map to start the measurement with a left click or touch of the map.

6. Go to the next point and left click or touch the map until you have identified the area of interest.

7. The total distance will display in the bottom middle of the page.

8. To remove the measurement, select  **Clear** icon.

9. To return to the **Property Report**, select the **Collapse**  icon.
