

School Catchment Map

How to change the default mapping area?

Currently the default area for the school catchment overlay is Toronto. Please move the map to the area of interest.

Why doesn't the schools catchment overlay open in the area of the property that I have selected in GeoWarehouse?

The school catchment overlay map is independent from GeoWarehouse mapping and will open to a default area. You may move the map to the area where the property is located to find school catchment information.

Why am I going back to an area that I looked at in my previous search?

When you select to view SCHOOLS again in a single GeoWarehouse session, the last area that you viewed will appear on the screen. To go to a new area please adjust the map to the area of interest.

How can I select a property from the school catchment map?

The school catchment map overlay is independent from GeoWarehouse mapping and you may not select a property from the map.

Why when I adjust the school catchment map, the land registry office (LRO) does not change in the search bar?

The school catchment map overlay is independent from GeoWarehouse mapping and will not update the LRO as you move the map window.

How may I print the school catchment map?

The school catchment map is for display purposes only and a print feature is not available.

How may I request a HoodQ report?

Instructions on how to purchase a HoodQ report can be found [here](#).
